VENUE

A visit was made to the venue where the Linklaters Banking Retreat will occur. We were joined by Helena Soares from the Corinthian Alfa Hotel.

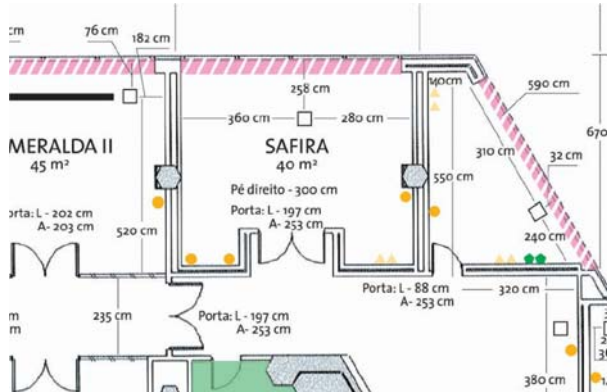

The Cyber Café setup will be made in the Safira Room, in the Business Centre area of the hotel.

Safira Room

PAGE BLANK

Safira Room CYBER CAFE LAYOUT

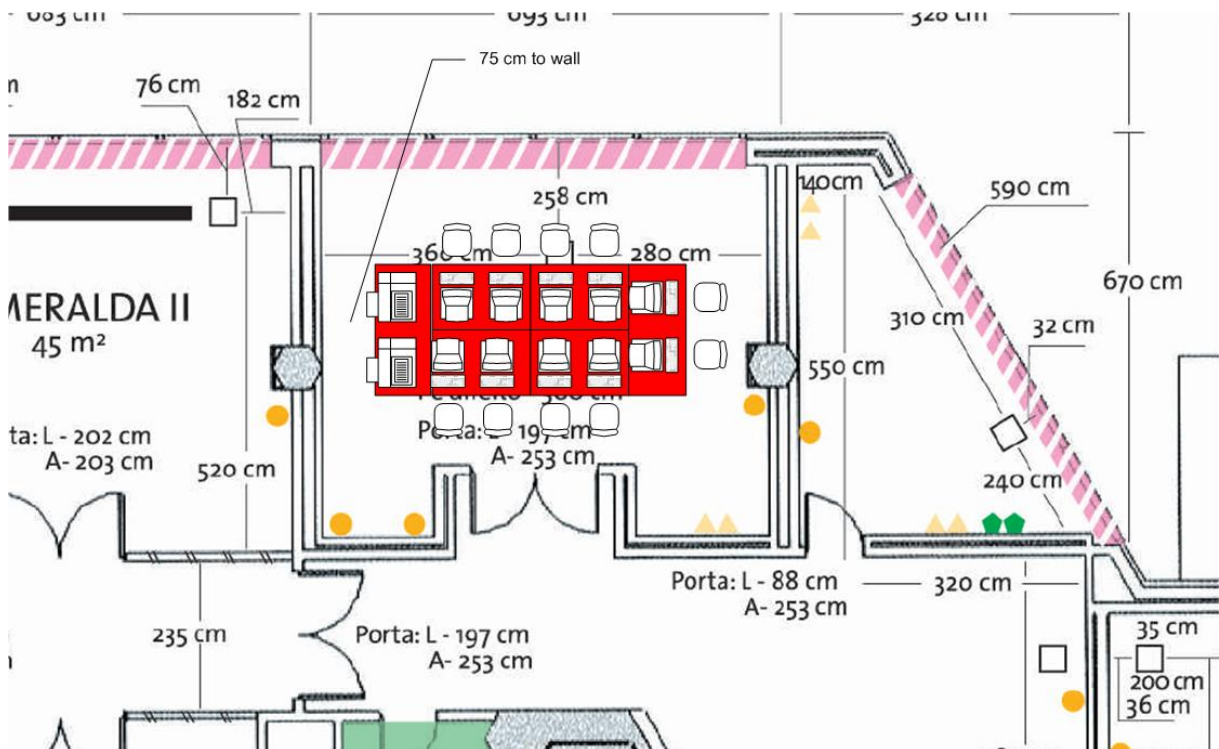

The room is not very large for a 10 PC's setup. The most practical equipment distribution is a centered table. Communication lines and electrical power are available in a floor box (see foto) centered in the middle of the room.

The PC's will be distributed according to it's planned use: 10 for Internet VPN access. All 10 PC's will be networked. 2 networked laser printers

A small rack will be used for the switch, ADSL Router and VPN Cisco, and will be placed in the room's middle, under the tables.

The tables to be used are the ones available at the hotel, size 152 X 76 cm.
